A small entry, but some sound animals forward, which should benefit the breed for the future. BIS was a sound male with quality and substance.

Not a large entry, but the breed is still relatively small in numbers. The concept of expanding the gene pool in the "British" equivalent of the pure breeds was a stroke of genius on the part of the early breeders within the BGS, and it's interesting to see the BGs maintaining the basic Golden characteristics, whilst potentially improving milk yields and udder characteristics. Well done for your perseverance. Thanks to all my helpers for your patience and forbearance in the very hot conditions.
